

## Something about » **CapFu** «

The Berlin project » **CapFu** « as handy short version of » **Captain Future** « because nevertheless - be aware of the penalty of the universe. A concrete mix of classic song structures and contemporary influences from Electro and Berlin club music to Alternative and Indie. 3 guys - bass, drums, combined with keys/electronics, which, if necessary, will be mixed with an organic guitar playing. For some kind of authentic, really handmade, chilled innovation. Something "in between" for sure, but something concrete, too. Like Berlin, the city we are living in. Big-City-Combination-Music with the spirit of Captain Future. For good deeds, for exploring new things and thereby - maybe saving the world.
